

Section 23: Outdoor Lighting Facilities

- 1.0 The Utility can install a private security light on your residential or commercial property under most conditions. All new requests for outdoor lighting require the applicant to sign a minimum two year contract for security lighting service. Customers having security concerns or would otherwise like to discuss outdoor lighting options, please contact our Engineering Department.
- 2.0 There are some restrictions which may limit the availability of outdoor lighting. The following types and sizes of lights are currently offered and can be installed on existing poles in most circumstances (Exhibit 9):
 - 100 watt High Pressure Sodium
 - 200 watt High Pressure Sodium
 - 250 watt High Pressure Sodium
 - 400 watt High Pressure Sodium
 - 400 watt metal halide flood
 - 1000 watt metal halide flood
 - 175 watt metal halide decorative fixture (for underground service only);
Decorative pole required at additional expense.

Mercury Vapor fixtures are no longer available. Existing mercury vapor fixtures may be repaired or replaced by Utility. Customers with mercury vapor fixtures will be given the option of replacing the fixture with a corresponding size and type fixture or having the fixture removed. The Utility's Engineering Department may be contacted for the availability of "leased lighting" for athletic fields and other specialty lighting systems.

- 3.0 Utility shall supply, install, and maintain the Fixture, all the equipment pertaining to the Fixture, and furnish electrical energy to the Customer. Utility shall, at the request of Customer, relocate or change existing Utility-owned equipment. Customer shall reimburse Utility for such changes at actual cost including appropriate overheads.
- 4.0 Other fees may apply depending on the installation, including but not limited to the cost for additional poles and wires for outdoor lighting. The cost for a new, 30' wooden pole for a security light only is \$200.00, payable at the time of application for outdoor lighting.
- 5.0 It is the Customer's responsibility to notify the Utility when an outdoor light is not operational or is damaged. The Utility will repair or replace the fixture as quickly as possible. No reimbursement will be made for fixtures that are not operational.
